FOREWORD

Fee strategies are becoming more and more important as the very structure of health care delivery changes. It is critical to the success of your medical practice for you to carefully review, analyze and adjust your fees frequently. This comprehensive publication is designed to help you accomplish this formidable task accurately, quickly, and easily.

The **Medical Fees Directory 2024**, our 28th annual edition, is a listing of medical procedure codes, descriptions, UCR fees at the 50th, 75th and 90th percentiles, Medicare fees and Medicare relative value units. The UCR fees listed in this publication are derived from an analysis of over 600 million actual charges. The CPT codes and descriptions are from the official CPT 2024 as published by the American Medical Association. The Medicare fees and RVUS are from the Medicare Physician Fee Schedule for Calendar Year 2024 as published in the *Federal Register*.

As I have written in numerous publications over the past 30 years, for every single physician that anyone can find who may be “over-charging” for medical services and procedures, I can find nine who are not charging as much as they should be. The **Medical Fees Directory 2024** provides complete, accurate, and statistically valid information regarding usual, customary and reasonable (UCR) as well as Medicare fees and provides an excellent resource for reviewing, adjusting and setting fees.

DISCLAIMER

This publication is designed to offer basic information regarding medical fees and fee schedule management. The information presented is based upon extensive analysis of various fee databases and the experience and interpretations of the authors. Though all the information has been carefully researched and checked for accuracy and completeness, neither the authors nor the publisher accepts any responsibility or liability regarding errors, omissions, misuse or misinterpretation.

CONTRIBUTORS

The **Medical Fees Directory 2024** is the result of a publishing collaboration between Context4 Healthcare Inc. and Practice Management Information Corporation.

Context4 Healthcare Inc.

Context4 Healthcare Inc. is a leading developer of reimbursement products for the health care industry. Perhaps best known for its CodeLink, Claims Editor and ICD-10-CM software programs, the firm also markets numerous fee, coding and regulatory database products. Context4 Healthcare Inc. products are used by thousands of health care organizations, from solo physician practices to Fortune 500 companies.

Context4 Healthcare Inc. usual, customary and reasonable (UCR) databases were developed over several years by a team of fee experts and mathematicians and were constructed using hundreds of millions of actual submitted charges evenly distributed throughout the United States. To ensure accuracy, charge data was obtained from a variety of sources including third-party payers, clearinghouses, practice management system vendors, billing services, universities, medical practices, hospitals and the Centers for Medicare and Medicaid Services (CMS). In addition to these sources, a database of more than 600 million submitted charges was utilized for reference.

Practice Management Information Corporation (PMIC)

PMIC is the nation's leading independent publisher and distributor of coding, payment and practice management books and software. The company is known for its innovative, high-quality products and excellent customer service. Over 100,000 physicians, hospitals, insurance carriers, and other health care professionals regularly choose PMIC for their coding and compliance resources.

PMIC specializes in creating “tools for the business of medicine” by reviewing the work methods, workspaces, and content needs of its customers and then adapting its products to those needs. To create this publication, PMIC takes raw CPT/UCR data from Context4 Healthcare Inc., adds comprehensive introductory materials, full CPT descriptions, and then applies proprietary formulas to estimate fees for new medical services and procedures.

James B. Davis, Editor

Medical Fees has been edited since its inception by James B. Davis, founder and President of Practice Management Information Corporation (PMIC). Mr. Davis has worked with health care professionals for over 40 years and is a nationally known expert in the areas of medical coding, compliance and practice management. Prior to founding PMIC he was an executive with Cedars-Sinai Medical Center and later founded Professional Data Systems (PDS) where he was responsible for processing over \$1 billion in medical claims. He is the author or editor of over 250 books about medical coding, billing, reimbursement and practice management and has given seminars to hundreds of health care professionals nationwide.

TERMINOLOGY

Managing the medical fee schedule and reimbursement process requires a fundamental working knowledge of the words and acronyms used by health care professionals, government agencies, health insurance plans and third-party payers to describe services, benefits and reimbursement policies. While glossaries are most often found in the back of books, we feel that readers should have an opportunity to review and learn new terminology before they encounter it within the text.

AAPCC: Adjusted Average Per Capita Cost

Accident and health insurance: Insurance under which benefits are payable in case of disease, accidental injury, or accidental death.

Actual charge: One of the factors determining a physician's payment for a service under Medicare; equivalent to the billed or submitted charge.

Adjusted average per capita cost (AAPCC): An estimate of the average per capita cost incurred by Medicare for each beneficiary in the fee-for-service system, adjusted by county for age, sex, program entitlement and geographic cost difference.

Adjusted historical payment basis (AHPB): The AHPB for a service in a locality is the average payment for that service under the current system.

Age/Sex rating: A method of structuring capitation payments based on enrollee/ membership age and sex.

AHPB: Adjusted Historical Payment Basis

Allowed charge [approved charge]: The amount Medicare approves for payment to a physician. Typically, Medicare pays 80 percent of the approved charge, and the beneficiary pays the remaining 20 percent. Physicians may bill beneficiaries for an additional amount above the approved charge.

Alternative Delivery System (ADS): A system of delivering health care benefits that is different from traditional indemnity systems. An HMO is an example of an ADS.

AMA: American Medical Association

Ambulatory Surgery: A surgical procedure for which a patient is admitted, treated and discharged the same day; also referred to as outpatient surgery.

Ambulatory Surgery Center (ASC): Any distinct entity that operates exclusively for the purpose of providing surgical services to patients not requiring hospitalization.

Annual deductible: See Deductible.

Antitrust Laws: Laws that prohibit institutional mergers and acquisitions, exclusive contracts, joint ventures, and other business dealings in areas that may substantially reduce competition or tend to produce a monopoly, and consequently have a detrimental effect on consumer welfare.

Approved charge: Payment for a physician service under CPR. Includes Medicare payment and the beneficiary's coinsurance, but not any balance bill. Also called Allowed Charge or Reasonable Charge.

ASC: Ambulatory Surgical Center

Assignment of benefits: A procedure whereby the subscriber authorizes the carrier to make payment of allowable benefits directly to the provider.

Assignment (Medicare): The term used to refer to a physician's decision to accept Medicare's allowed charge as payment in full; a guarantee not to balance bill.

Assistant-at-surgery: An individual who has the necessary qualifications to participate in a particular operation and actively assists in performing the surgery.

Balance bill/extra bill: Physicians' charges exceeding the Medicare-allowed charge.

Balance billing: Billing the patient or beneficiary for any fee more than the amount allowed by the insurance carrier.

Beneficiary: A person eligible to receive benefits under a health care plan. The term is commonly used with Medicare and Medicaid. Under Part B of Medicare, Americans over 65, many disabled individuals, and certain individuals with end-stage renal disease can become beneficiaries by paying a monthly premium.

BMAD: Part B Medicare Annual Data Files

Bonus Payment: An additional amount paid by Medicare for services provided by physicians in Health Professional Shortage Areas (HPSAs).

Bundling: The use of a single payment for a group of related procedures or services.

Capitation: A census-driven reimbursement system wherein a fixed amount is paid per patient enrolled monthly to the physician to cover services.

Carrier: The insurance company which writes and administers the health insurance policy.

Carrier [Medicare]: A private contractor who administers claims processing and payment for Part B Medicare services. *See Part B [Medicare].*

Case management: Monitoring and coordinating the delivery of health services for individual patients to enhance care and manage costs. Often used for patients with specific diagnoses or who require high-Cost or extensive health care services.

Case rate: A fixed fee for all care associated with a specific procedure.

CF: Conversion Factor

Charge reduction [Medicare]: The percentage difference between a provider's billed charge and the Medicare allowed charge.

Claim: A demand to the carrier, by the insured person, for payment of benefits under a policy.

Claim form: A form used to present claim information in an organized manner to the carrier. *See CMS1500.*

Clinical Laboratory Improvement Act (CLIA): Set standards to be met by all clinical laboratories, regardless of location, size, or type of laboratory. These standards are based on the complexity of tests performed by the laboratory. Regulations define four levels of testing complexity: waived, moderate complexity, and physician-performed microscope procedures. The Health Care Financing Administration requires all laboratories to register to perform testing at any or all these levels.

CMS: Centers for Medicare and Medicaid Services. The government agency which administers the Medicare and Medicaid programs, formerly known as the Health Care Financing Administration (HCFA).

CMS1500: A universal insurance claim form that is mandated for Medicare billing and generally accepted by all insurance carriers.

COB: Coordination of Benefits

COBRA: Consolidated Omnibus Budget Reconciliation Act of 1985. P.L. 99-272, enacted April 1986.

Coding: The process of choosing codes which properly identify and define medical services and procedures and diagnoses.

Coinsurance: The portion of the balance of covered medical expenses which a beneficiary must pay after payment of the deductible. Under Medicare Part B, the beneficiary pays coinsurance of 20 percent of allowed charges. *See Deductible.*

Competitive pricing: Pricing methods that use market information to establish payment rates that reflect the costs of an efficient HMO or health care provider. One well-known method is competitive bidding, which elicits information on costs through a bidding process.

Comprehensive medical insurance: A policy designed to give the protection offered by both a basic and a major medical health insurance policy.

Conditions of Participation (COP): COPs are statutory requirements that facilities must meet to enter various Medicare/ Medicaid contracts with CMS. These standards include those regarding the facility's governing body and management; its compliance with federal, state, and local laws pertaining to health and safety; its procedure for protecting client rights and keeping client records; and its staffing and provision of services under arrangement with outside sources.

Consolidated Omnibus Budget Reconciliation Act (COBRA): Requires an employer to offer employees and their dependents the opportunity to continue their group health coverage under the employer's plan upon the occurrence of certain events that otherwise would cause them to lose their employment-related health plan coverage. COBRA imposes a host of rules governing the obligations and duties of both employers and qualified beneficiaries involved in coverage-Continuation situations. Specific rules under COBRA, for example, address such issues as the length of the required coverage period, notification requirements for employers and plan administrators, procedures for electing continuation coverage, premiums the employer may require beneficiaries to pay, and the circumstances under which an employer may terminate COBRA coverage short of the full continuation period.

Conversion factor: The multiplicative factor applied to the relative value scale to produce a schedule of dollar amounts of payment for physicians.

Conversion factor update: Annual percentage change to the Medicare Fee Schedule conversion factor, established by the Congress or the default formula under Volume Performance Standards.

Coordination of Benefits (COB): A provision in an insurance plan that when a patient is covered under more than one group plan, benefits paid by all plans will be limited to 100 percent of the actual charge.

Copayment: A type of cost sharing where the insured party is responsible for paying a fixed dollar amount per service. Sometimes used more generally as a synonym for cost sharing.

Cost of practice index [Medicare]: A measurement of the differences across geographic areas of the cost of operating a medical practice.

Cost sharing: The portion of payment for health expenses that the beneficiary must pay, including the deductibles, copayments, coinsurance, and balance bill.

Cost shifting: A situation wherein a health care provider compensates for the effect of lower revenue from one payer by increasing charges to another payer.

Coverage decision: A decision by a health plan or insurer whether to pay for or provide a medical service or technology for clinical indications.

CPI: Consumer Price Index

CPR: Customary, Prevailing, and Reasonable. The method used by Medicare to determine payments to providers prior to the Medicare Fee Schedule.

CPT [Current Procedural Terminology]: A system of procedure codes and descriptions, and rules and conventions used by medical procedures to classify and report services and procedures. This procedure coding system is accepted by virtually all commercial insurance carriers and is mandated by Federal law for

Medicare and Medicaid and other government health programs.

CQI: Continuous Quality Improvement

Cross-over patient: A patient who has both Medicare and Medicaid coverage.

CRS: Congressional Research Service

Current Procedural Terminology: See CPT.

Customary charge: One of the factors determining a physician's payment for a service under Medicare. Calculated as the physician's median charge for that service over a prior 12-month period. See Customary, Prevailing, And Reasonable.

Customary, Prevailing, and Reasonable (CPR): The method of paying physicians under Medicare from 1965 until implementation of the Medicare Fee Schedule in January 1992. Payment for a service was limited to the lowest of 2) the physician's billed charge for the service; 2) the physician's customary charge for the service; or 3) the prevailing charge for that service in the community. Like the usual, customary, and reasonable system used by private insurers.

Deductible: A stipulated amount which the covered person must pay toward the cost of medical treatment before the benefits of the program go into effect. Medicare Part B has an annual deductible of •100.

Deductible carryover: A feature of an insurance plan whereby covered charges in the last three months of the year may be carried over to be counted toward the next year's deductible.

Diagnosis related groups (DRGs): A system of classifying medical cases for payment based on diagnoses. Used under Medicare's prospective payment system (PPS) for inpatient hospital services.

Direct costs: The labor, supply and equipment costs directly attributable to the provision of a specific service.

DME: Durable Medical Equipment

DME-MAC: Durable Medical Equipment Medicare Administrative Contractor (formerly known as DMERC). Four contracted regional carriers which process Medicare claims for DME, orthotics, prosthetics and supplies. Providers are required to obtain supplier numbers and disclose ownership prior to submitting claims.

Down coding: A process used by insurance carriers to reduce the value of billed procedures by changing the codes submitted to ones of lower value. Procedure code and procedure description mismatch, and diagnosis code not supporting the level of care are the two most common opportunities for insurance carrier down coding.

DRG: Diagnosis Related Groups

E/M: Evaluation and Management

Electronic claim: A claim form which is processed and delivered from one computer to another via some form of magnetic media (magnetic tape, diskette) or via telecommunications (telephone link).

EM: Evaluation and Management

EMC: Electronic Media Claim

EOB [Explanation of Benefits]: A form included with a check from the insurance carrier which explains the benefits that were paid and/or charges that were rejected.

EOMB: Explanation of Medicare Benefits

Evaluation and Management (EM)

services: Nontechnical services provided by most physicians for the purpose of diagnosing and treating diseases and counseling and evaluating patients.

Exclusions: Specific services or conditions which the policy will not cover, or which are covered at a limited rate.

Explanation of Benefits: See EOB.

Fee-For-Service (FFS): Refers to paying medical providers for individual services rendered. UCR, CPR, and Fee Schedules are examples of fee-for-service systems.

Fee schedule payment areas: Geographic areas within which payment for a given service under the fee schedule will be the same. See Geographic Adjustment Factor.

Fee schedule: A list of predetermined payments for medical services.

FFS: Fee-for-Service

Fiscal Intermediary (FI): A private contractor who administers claims for Part A services (for example hospital and nursing home) and some Part B services (such as hospital outpatient departments).

FY: Fiscal Year

GAF: Geographic Adjustment Factor

Gaming: Gaining advantage by using improper means to evade the letter or intent of a rule or system.

Generalists: Physicians whose training and practice is not limited by health condition or organ system, who provide comprehensive and continuous services, and who make decisions about treatment for patients presenting with undifferentiated symptoms. Typically include family practitioners, general internists, and general pediatricians.

Geographic Adjustment Factor (GAF): The adjustment made to a service's fee in the Medicare Fee Schedule to determine the correct payment in each fee schedule payment area. As defined in OBRA89, the geographic adjustment factor for a service is created by combining three separate adjustment factors, one for each component of the Medicare Fee

Schedule: physician work, practice expense, and malpractice expense. The adjustment factors for physician work, practice expense, and malpractice are based on the same measures that underlie the GPCI.

Geographic Adjustment Method

(Medicare): The method used to convert Medicare U.S. average fee-for-service per capita costs (USPCCs) to the local adjusted average per capita costs (AAPCCs) used to pay Medicare risk contracting HMOs.

Geographic Practice Cost Index (GPCI):

An index summarizing the prices of inputs to physician services in an area relative to national average prices. The GPCI as originally defined is based on three components, reflecting the opportunity cost of physician work, the costs of goods and services that comprise practice expenses, and malpractice expenses. The GPCI is a single measure that combines these three fixed shares, while the GAF of the Medicare Fee Schedule allows for each service to reflect different shares, creating a GAF for each service. See Geographic Adjustment Factor.

Global service: A group of clinically related services that are treated as a single unit for the purpose of coding, billing, and payment.

Global surgery policy: The payment policy in the Medicare Fee Schedule that specifies the surgical procedure and the related services and visits which are included in a global surgical fee. Separate payment is permitted for the initial evaluation, services for unrelated problems, and return trips to the operating room because of complications.

GPCI: Geographic Practice Cost Index

Harvard relative value study: A study completed by William Hsiao, Ph.D. at Harvard University to develop a resource-based relative value scale and to be used to develop the Medicare Fee Schedule.

HCPCS: See Health Care Common Procedure Coding System.

Health Care Common Procedure Coding System (HCPCS): Coding system based on CPT but supplemented with additional codes for nonphysician services; required for coding by Medicare carriers.

Health Maintenance Organization (HMO): A type of managed-Care plan that acts as both insurer and provider of a comprehensive set of health care services to an enrolled population. Benefits are financed through capitation with limited copayments, and services are provided through a system of affiliated providers.

Health plan: An organization that acts as an insurer for an enrolled population. May be structured as a fee-for-service or managed care plan.

Health Professional Shortage Areas (HPSAs): Replaces Health Manpower Shortage Areas (HMSAs). A Health Professional Shortage Area means any of the following which the Secretary of the Department of Health and Human Services determines has a shortage of health professionals: (1) an urban or rural area (which need not conform to the geographic boundaries of a political subdivision, and which is a rational area for the delivery of health services); (2) a population group; (3) a public or nonprofit private medical facility. Designated HPSAs can apply for National Health Services Corps (NHSC) personnel or be eligible for the NHSC scholarship program or health profession student loan program.

HHS: U.S. Department of Health and Human Services (also referred to as DHHS).

HI: Hospital Insurance

HMO: An organization that provides comprehensive health services to its members in return for a fixed prepaid fee. There are four types of HMOs: group, staff, independent practice association, and network.

Home Health Agency (HHA): An HHA is a public or private agency or organization, or part of an agency or organization, which meets the requirements for participation in

Medicare, which provides services to a beneficiary at this or his or her place of residence, on his or her physician's orders.

Home Health Care (HHC): HHC consists of the services provided to a recipient at his place of residence on physician's orders as part of a written plan of care. These services include nursing service, home health aide service, physical or occupational therapy, and speech pathology and audiology services. Medical supplies, equipment, and appliances suitable for use in the home are also covered under HHC.

HPSA: Health Professional Shortage Area

HSA: Health Service Area

ICD-9-CM [International Classification of Diseases – 9th Revision – Clinical Modification]: A standardized system of describing diagnoses by code numbers developed and maintained by the World Health Organization. Replaced by ICD-10-CM in 2015.

ICD-10-CM [International Classification of Diseases – 10th Revision – Clinical Modification]: A standardized system of describing diagnoses by code numbers developed and maintained by the World Health Organization. Implemented nationwide in 2015.

ICD-10-PCS [International Classification of Diseases- 10th Revisions – Procedure Coding System]: A standardized system of describing procedures performed in the acute hospital setting. Replaced ICD-9-CM Volume 3 Procedure Codes in 2015.

Indemnity schedule: See *Schedule of Allowances*.

Independent Practice Association (IPA): An HMO that contracts with individual physicians to provide services to HMO members in a negotiated per capita or fee-for-service rate. Physicians maintain their own offices and can contract with other HMO's and see other fee-for-service patients.

Insurance clerk: One of the health care professional's employees assigned the very important job of managing insurance claims in the medical office.

Insured: The person who represents the family unit in relation to the insurance program. Usually, the employee whose employment makes this coverage possible.

Insurer: See CARRIER.

Intermediary: An insurance carrier, or data processing company, designed to receive and process Medicare or Medicaid claims on behalf of the government.

International Classification of Diseases: See ICD-10-CM.

IPA: See *Independent Practice Association*.

LCL: Lowest Charge Level Limit

Level 2 codes: See HCPCS.

Limited License Practitioner (LLP): A professional licensed to perform certain health services in independent practice (for example, podiatrists, dentists, optometrists, and chiropractors).

Limiting charge: The maximum amount that a nonparticipating physician is permitted to charge a Medicare beneficiary for a service; a limit on balance billing.

LLP: Limited License Practitioner

Local codes: See HCPCS.

Locality [Medicare]: A geographic area for which a carrier calculates prevailing charges. Localities can be states, aggregations of counties, parts of counties, metropolitan zip code areas, or townships.

Long Term Care (LTC): Health care for patients with chronic disabilities or who suffer from chronic disease requiring assistance with routine activities of daily living.

MAAC [Maximum Allowable Actual Charge]: A limitation on billed charges for Medicare services provided by non-participating physicians. For physicians with charges exceeding 115 percent of the prevailing charge for nonparticipating physicians, MAACs limit increases in actual charges to 1 percent a year. For physicians whose charges are less than 115 percent of the prevailing, MAACs limit actual charge increases so they may not exceed 115 percent. *See Actual Charge, Nonparticipating Physician.*

Major medical insurance: Health insurance to finance the expense of major illnesses and injuries. Major medical policies usually include a substantial deductible clause. Above the initial deductible, major medical insurance is characterized by large benefit maximums.

Malpractice expense: The cost of professional liability insurance incurred by the physicians. A component of the Medicare relative value scale.

Managed care: Any system of health service payment or delivery arrangements where the health plan attempts to control or coordinate use of health services by its enrolled members to contain health expenditures, improve quality, or both. Arrangements often involve a defined delivery system of providers with some form of contractual arrangement with the plan.

Management Service Organization (MSO): An entity which provides practice management and other support services to physicians. May include administrative support services such as marketing, billing, financial management, nursing pools, and staff recruitment, etc. Some MSOs purchase the assets of physician practices outright, install office managers and other personnel, and hire physicians through professional service contracts.

Maximum fee schedule: A compensation arrangement in which a participating physician agrees to accept the Schedule of

Allowances as his total fee for covered services.

Maximums: The top limit of the amount a carrier will pay for a specific benefit or policy during a specified time period.

Medicaid: A program of federal matching grants to the states to provide health insurance for the poor and medically indigent. States share in financing the program and determine eligibility and benefits consistent with federal standards.

Medicare cost contract: A contract between Medicare and a health plan under which the plan is paid based on reasonable costs to provide some or all Medicare-Covered services for enrollees.

Medicare Economic Index (MEI): An index that tracks changes over time in physician practice costs and general earnings levels. Since 1975, increases in prevailing charge screens have been limited increases in the MEI. *See Prevailing Charge.*

Medicare Fee Schedule (MFS): The resource-based fee schedule currently used by Medicare to pay for physicians' services. This fee schedule is based on resource costs and composed of factors representing physician work and practice costs.

Medicare: A federal health insurance program for people 65 or over and for disabled persons with chronic renal disorders.

Medigap insurance: Private health insurance policies designed to supplement Medicare coverage. Benefits may include payment of Medicare deductibles, coinsurance, and balance bills, and payment for services not covered by Medicare.

Mediplan Health Care Act: Health care reform proposal introduced by Representative Fortney "Pete" Stark (H.R. 2610).

MEI: Medicare Economic Index

MFS: Medicare Fee Schedule

Modifiers: Codes used to supplement CPT or HCPCS codes that permit payment to differ for a subset of services billed. They may indicate that the service has been changed in some way.

MSA: Metropolitan Statistical Area

MSO: Management Services Organization

MSP: Medicare Secondary Payor

MUA: Medically Underserved Area

National Claims History (NCH) system: A CMS data reporting system that combines both Part A and Part B claims in a common file.

National codes: See HCPCS.

National practitioner data bank: A permanent record maintained by the U.S. Public Health Service of disciplinary actions taken against physicians and all payments made on behalf of physicians for actual or potential malpractice claims.

NCH: National Claims History (Medicare)

NCQA: National Committee for Quality Assurance

Non-participating physician [Medicare]: A physician who does not sign a Medicare participation agreement, and therefore is not obligated to accept assignment on all Medicare claims. Frequently defined as Nonpar. See Participating Physician, Participating Physician and Supplier Program.

Nonphysician Practitioner (NPP): A health care professional who is not a physician. Examples of NPPs are advance practice nurses, physician assistants, and certified registered nurse anesthetists.

NPP: Nonphysician Provider

Outcome: The consequence of a medical intervention on a patient.

Outcomes and effectiveness research:

Medical or health services research that attempts to identify and understand the clinical outcomes (including mortality, morbidity, and functional status) of the delivery of health care.

Overvalued procedure: Procedures whose prevailing charges have been reduced because they were considered “overvalued” by historical CPR.

Paid amount: The portion of a submitted charge that is actually paid, by both third-party payers and the insured, including copayments and balance bills. For Medicare this amount may be less than the allowed charge if the submitted charge is less, or it may be more because of balance billing.

PAR: Participating Physician and Supplier Program (Medicare)

Part A [Medicare]: The Hospital Insurance program, which covers the cost of hospital and related posthospital services. As an entitlement program, it is available without payment of a premium. Beneficiaries are responsible for an initial deductible per spell of illness and coinsurance for some services.

Part B [Medicare]: The Supplementary Medical Insurance program (SMI); covers the costs of physician services, outpatient laboratory and x-ray tests, durable medical equipment, outpatient hospital care, and certain other services. As a voluntary program, Part B requires payment of a monthly premium. Beneficiaries are responsible for a deductible and coinsurance payment for most covered services. See Beneficiary.

Partial capitation: An insurance arrangement where the payment made to a health plan is a combination of a capitated premium and payment based on actual use of services; the proportions specified for these components determine the insurance risk faced by the plan.

Participating Physician and Supplier Program (PAR): A program that provides

financial and administrative incentives for physicians and suppliers to agree in advance to accept assignment on all Medicare claims for a one-year period.

Participating physician: A physician who signs a participation agreement, agreeing to accept assignment on all Medicare claims for a period of one year. Frequently referred to as PAR.

Payment rate: The total amount paid for each unit of service rendered by a health care provider, including both the amount covered by the insurer and the consumer’s cost sharing.

Per diem: Method of reimbursement based upon a flat rate for each day of care to a patient.

Percentile: A measure used in statistics indicating the value below which a given percentage of observations in a group of observations fall. For example, the 50th percentile is the value (or score) below which 50% of the observations may be found.

Performance measure: A specific measure of how well a health plan does in providing health services to its enrolled population. Can be used as a measure of quality.

Performance standard: The target rate of expenditure growth set by the Volume Performance Standard system.

Periodic review of relative values: The recalibration of Medicare’s relative value scale to account for changes that occur over time. CMS is required to conduct a periodic review at least every five years.

PF: Provider File

PHP: Prepaid Health Plan

Physician-Hospital Organization (PHO): A separate legal entity owned by a hospital and participating physicians which can contract with insurance companies, HMOs or self-insured employers for the provision of

medical services. The PHO may also undertake utilization review, credentialing, and quality assurance. Physicians retain ownership of their own practices, maintain significant business outside the PHO, and typically continue in their traditional practice style.

Physician work: A measure of the physician's time, physical effort and skill, mental effort and judgement, and stress from iatrogenic risk associated with providing a medical service. Physician Work is a component of the Medicare relative value scale.

PIN: A code used to report performing physicians and group numbers. PIN stands for Provider Identification Number and is commonly known as the provider number.

Portability: The requirement that insurers waive any preexisting condition exclusion for someone who was previously covered through other insurance as recently as 30 to 90 days earlier.

POS: Point-of-Service

Point-of-service plan: A managed care plan that combines features of both prepaid and fee-for-service insurance. Health plan enrollees decide whether to use network or non-network providers at the time care is needed and usually are charged sizable copayments for selecting the latter.

Policy holder: See Insured.

PPO: Preferred Provider Organization

PPRC: Physician Payment Review Commission

PPS: Prospective Payment System

Practice expense: The cost of nonphysician resources incurred by the physician to provide physician services. Examples are salaries and the cost of fringe benefits received by nurses, physician assistants, and receptionists who are employed by the physician, and the expenses

associated with purchase and use of medical equipment and supplies in the physician's office.

Practice guidelines: An explicit statement of what is known and believed about the benefits, risks, and costs of courses of medical action. Intended to assist decisions by practitioners, patients and others about appropriate health care for specific clinical conditions.

Preauthorization: See Precertification.

Precertification: The process of obtaining permission to perform a service from the insurance carrier before the service is performed.

Predetermination: The process of obtaining an estimate of what an insurance carrier will pay for service(s) before the service(s) is/are performed.

Preexisting condition exclusion: A practice of some health insurers to deny coverage to individuals for a certain period, for example, six months, for health conditions that already exist when coverage is initiated.

Preferred Provider Organization (PPO): A managed care health plan that contracts with networks or panels of providers to furnish services and be paid on a negotiated fee schedule. Enrollees are offered a financial incentive to use providers on the preferred list but may use non-network providers as well.

Premium: An amount paid periodically to purchase medical insurance benefits.

Preventive care: Treatment that aims to avoid the development of illness.

Primary carrier: The insurance carrier which has first responsibility under Coordination of Benefits.

PRO: Peer Review Organization

Procedure coding: See Coding.

Professional component: The part of a relative value or fee that represents the cost of a physician's interpretation of a diagnostic test or treatment planning for a therapeutic procedure.

ProPAC: Prospective Payment Assessment Commission

Prospective Payment System (PPS): The Medicare system used to pay hospitals for inpatient hospital services based on the DRG classification system.

Provider: The person in relation to the insurance program who provides covered services and supplies to the beneficiary.

Provider contracting: Arrangements between managed health care plans and provider in which provider agrees to provide services for plan members.

Provider-Sponsored Organization (PSO): A PSO is a public or private entity established and operated by a health care provider, or a network of affiliated health care providers, which shares substantial financial risk with respect to the provision of those services and has at least a majority financial interest in the entity. PSOs must meet federal standards for quality and solvency, comply with Medicare contractor requirements, and deliver a substantial portion of coordinated care through the affiliated network of providers.

QA: Quality Assurance

Quality assurance: A formal, systematic process to improve quality of care that includes monitoring quality, identifying inadequacies in delivery of care, and correcting these inadequacies.

Rate setting: An approach to cost containment where the government establishes payment rates for all payers for various categories of health services.

Refinement: The correction of relative work values in Medicare's relative value scale which were initially set incorrectly.

Reinsurance: An insurance arrangement where an insurer pays a premium into a pool, and any claims paid by the insurer above a predefined dollar level are covered in whole or in part by the pool.

RBRVS [Resource Based Relative Value Scale]: A government mandated relative value system, based on a study conducted at Harvard University, used for calculating national fee schedules for services provided to Medicare patients.

Reasonable charge: The amount Medicare will pay for a covered service. This is usually the lowest of the actual, customary and prevailing charges.

Relative Value (RV): A value that reflects a comparison with an arbitrary standard.

Relative Value Scale (RVS): An index that assigns specific numeric values to medical services. Multiplying the relative value by a conversion factor results in a fee.

Relative Value Unit (RVU): The unit of measure for a relative value scale. RVUs must be multiplied by a dollar conversion factor to become payment amounts.

Relative Work Value (RWV): An assigned value that reflects the average work of a physician of average efficiency relative to a standard.

Release of information: The patient's signature indicating consent to the release of information necessary for settlement of his or her insurance claim.

Resource Based Relative Value Scale: *See RBRVS.*

Resource costs: The costs of the inputs used by an efficient physician to provide a service or procedure, including both the costs of the physician's own time and effort and the costs of nonphysician inputs. The apparently redundant use of "resource" with "costs" is a convention used to indicate the average costs of an efficient physician, as distinguished

from cost-based reimbursement such as that used for hospitals prior to the prospective payment system.

Revenue share: The proportion of a practice's total revenue devoted to a particular type of expense. For example, the practice expense revenue share is that proportion of revenue used to pay for practice expense.

RHC: Rural Health Center

RUC: RVS Update Committee

RVS: Relative Value Scale

RVU: Relative Value Unit

RWV: Relative Work Value

Schedule of allowances: A list of specific amounts which the carrier will pay toward the cost of medical services provided.

Secondary carrier: The insurance carrier which is second in responsibility under Coordination of Benefits.

Self-insured health plan: Employer-provided health insurance in which the employer, not an insurer, is at risk for its employees' medical expenses.

Severity modifier: An adjustment that reflects the effect of patient factors, such as severity of illness, comorbidity, or risk of complications, on the relative work required to deliver a service.

Site-of-service differential: The difference in the amount paid when the same service is performed in different practice settings, for example, an outpatient visits in a physician's office or a hospital clinic.

Specialty differential: The difference in the relative value or amount paid for the same service when performed by different specialists. Medicare does not recognize specialty differentials.

Staff model HMO: An HMO in which physicians practice solely as employees of the HMO and usually are paid a salary.

Standard benefit package: A defined set of health insurance benefits that all insurers are required to offer.

Submitted charge: The charge submitted by a provider to the patient or a payer.

Subscriber: See Insured.

Superbill: A multi-part form which provides sufficient information so that patients may file their own insurance claim forms.

Supplemental health services: Benefits offered by an HMO that exceed their basic health service requirements.

Supplemental Security Income (SSI): A federal income support program for low-income disabled, aged, and blind persons. Eligibility for the monthly cash payments is based on the individual's current status without regard to previous work or contributions to a trust fund.

Supplementary Medical Insurance (SMI): The Medicare program that covers the costs of physicians' services, outpatient laboratory and x-ray tests, durable medical equipment, outpatient hospital care, and certain other services. This voluntary program requires payment of a monthly premium, which covers about 25 percent of program costs. Beneficiaries are responsible for a deductible and coinsurance payments for most covered services. Also called Part B coverage or benefits.

Supplier: Providers, other than practitioners, of health care services. Suppliers under Medicare include independent labs, durable medical equipment providers, ambulance services, orthotists, prosthetists, and portable x-ray providers.

Table of allowances: See *Schedule of Allowances*.

Technical component: The part of the relative value or fee for a procedure that represents the costs of doing the procedure excluding physician work.

Third Party Administrator (TPA): An administrative organization other than the insurance company or health care provider that collects insurance premiums, pays claims and provides administrative services.

TW: Total Work

UCR [Usual, Customary, and Reasonable]: A method of determining benefits by comparing the physician's charges to those of his or her peers in the same community and specialty. Sometimes called Customary, Prevailing, and Reasonable.

Unbundling: The process of coding, billing, and requesting payment for services that are generally included in a global charge.

Upcoding: The process of selecting a code for a service that is more intense, extensive, or has a higher charge, than the service provided.

Update for new and revised codes: Yearly process of determining the relative values of new and revised codes for Medicare's relative value scale.

UPIN: [Unique Physician Identification Number] A unique code number used to identify referring and ordering physicians who may bill the Medicare program.

UR: Utilization Review

Usual, Customary, and Reasonable: See UCR.

Utilization review: The process of reviewing services provided to determine if those services were medically necessary and appropriate. May be performed on a concurrent or a retrospective basis.

Volume [behavioral] offset: The change in the volume of services that occurs in reaction to a change in fees. A 50 percent volume

offset means that half of the savings from fee reductions will be offset by increased volume of services.

Volume Performance Standard (VPS): A mechanism included in OBRA89 to adjust fee updates for the Medicare Fee Schedule based on how annual increases in actual expenditures compare to previously determined performance standard rates of increase.

VPS: Volume Performance Standard

Workers' compensation: State laws which provide coverage of medical expenses for employees who are injured during performance of their work

INTRODUCTION

The process of setting fees for medical services and procedures is a complex task that encompasses various factors and considerations beyond just determining the monetary value of each service. To effectively set fees, healthcare providers need to have a deep understanding of several critical elements:

UNDERSTANDING HEALTHCARE PAYMENT SYSTEMS

A comprehensive grasp of how health insurance plans and third-party payers process and reimburse healthcare claims is essential. This includes knowledge of coding, claim submission, and appeals processes.

VALUE-BASED PRICING

Providers should adopt a method for determining the value of their procedures and services. This involves assessing the clinical outcomes, patient satisfaction, and the overall impact on patient health and well-being.

LOCAL MARKET RATES

Being aware of the prevailing rates in your specific medical community is crucial. Knowing what other providers charge for similar services can help you position your fees competitively.

REGULATORY COMPLIANCE

Staying up-to-date with the intricate web of regulations, laws, and guidelines related to Medicare, Medicaid, Worker's Compensation, and private insurance billing is imperative. Compliance ensures you avoid legal issues and receive timely reimbursements.

THIRD-PARTY PAYER RULES

Understanding the billing rules and regulations imposed by non-governmental health insurance plans and third-party payers is essential for accurate claim submissions and timely payments.

MARKETING STRATEGY

Recognize that your fees are a component of your overall marketing strategy. Evaluating your fees periodically and considering adjustments is necessary. While raising fees is common, reducing them may also be necessary to remain competitive in an increasingly crowded market.

FAIR PRICING

The ultimate goal of fee schedule management is to establish a fair and reasonable price for your services. Strive to be compensated as close to this price as possible for the majority of cases.

COMPLEXITY OF THE PROCESS

Acknowledge that both setting fees and navigating the payment process are intricate and multifaceted tasks that require continuous attention and refinement.

In summary, the process of setting fees for medical services and procedures is multifaceted and involves a comprehensive understanding of healthcare payment systems, regulatory compliance, market dynamics, and the value your services provide to patients. Continual review and adaptation of your fee structure are essential to remain competitive and ensure fair compensation for your services in today's healthcare landscape.

KEY POINTS REGARDING SETTING FEES

1. It is difficult to obtain fee information, profiles, relative values, or conversion factors from most non-governmental health insurance plans and/or third-party payers. In addition, medical professionals who are not in the same medical practice are prevented by Federal antitrust legislation from discussing fees for medical services and procedures or asking

what competing professionals are paid by a health insurance plan.

2. Some variation of the Medicare Fee Schedule (MFS) based on the Resource Based Relative Value Scale (RBRVS) will likely become the method used for payment by all health insurance plans and third-party payers in the near future.
3. Charging a fee less than what the health insurance plan or third-party payer would pay benefits the health insurance plan or third-party payer, not you or your patient.
4. Health insurance plans and third-party payers may be paying you 25-50% less than they are paying your peers for the same service, simply because you have been careless in maintaining your fee schedule and provider profile.
5. Except for fees for elective plastic surgery, most medical fees are ultimately negotiated or discounted, voluntarily or involuntarily.
6. Fee schedule management puts you in control of the payment process.

PRACTICE MANAGEMENT APPLICATIONS

FEE SCHEDULE REVIEW

The primary application of the information contained in this publication is to review your fees in comparison to the report to determine where your fees rank on a national basis. Your fees may then be adjusted, if appropriate, based upon the results of your review and analysis.

BARGAINING WITH THIRD PARTY PAYERS

It is important to your patients and your practice that health insurance plans and third-party payers are paying you and/or your patients based upon current, and accurate, UCR data for your geographic area and

specialty. Theoretically, the percentile distribution of fees for a specific procedure or service performed in each geographic area should be identical for all health insurance plans and third-party payers. However, these numbers vary considerably and are also affected by the payment policies of specific health insurance plans and third-party payers.

Remember that under the usual, customary and reasonable concept, the health insurance plan and/or third-party payer will gladly pay you less than their allowable or customary amount if that's what you billed them. In addition, you can't increase your fees retroactively. However, if the health insurance plan and third-party payer's allowables or customary amounts are significantly below your fees, resulting in low payments to you and/or your patients, then you should compare the codes that appear to be underpaid with the data in this publication. If you find that the published data supports a higher payment, then you should appeal the payment to the health insurance plan and/or third-party payer.

We strongly suggest that you support your appeal letter by attaching a photocopy of the front cover of this book and the page(s) that include the codes and fees that you are basing your appeal on. We don't guarantee that this will work every time; however, our customers have informed us that this does indeed work most of the time.

COST BENEFIT ANALYSIS

This publication can be used to perform cost benefit analyses for both equipment and human resources. For example, suppose your group practice is considering installing its own automated laboratory equipment or x-ray equipment. A careful review of the Radiology and/or Laboratory sections of this publication will provide you with the fee data you need to perform a cost/benefit analysis for the equipment. You would need to supply the estimated frequency for each service and the acquisition cost of the equipment to complete the analysis.

Likewise, you can perform a similar calculation based upon human resources. For example, suppose you are considering adding an associate to your practice. A careful review of the Evaluation & Management and appropriate specialty sections of the publication will provide you with the fee data you need to perform a cost/benefit analysis for the associate. As above you would need to provide the estimated frequency for each service and the cost of maintaining the human resource. In either of these examples, you would also have to adjust the forecast total charges by your average collection ratios to achieve an accurate forecast of revenues.

SOURCES OF THE DATA

The usual, customary and reasonable (UCR) fees listed in this book were developed over a period of several years. More than 400 million actual physician charges provide the basis for listed fees, service bureaus, group practices, clinics, universities, and practice management system vendors are among the many types of organizations that supplied the claims data utilized for fee schedule development. Although the creation of a fee schedule may seem rather straightforward, the process is quite complex. For example, many of the codes listed in CPT are performed infrequently. Thus, even with the largest of fee databases, there may be so few instances of a particular code's usage that it is difficult to establish reliable percentile ranges. As another example, some services as listed in CPT are considered variable in performance. That is, when one physician reports the code, he/she may include items or services that another physician does not provide. Clearly, this can significantly impact UCR fee levels. fee databases, there may be so few instances of a particular code's usage that it is difficult to establish reliable percentile ranges. As another example, some services as listed in CPT are considered variable in performance. That is, when one physician reports the code, he/she may include items or services that another physician does not provide. Clearly, this can significantly impact UCR fee levels.

RELATIONSHIP TO PAYER ALLOWABLES

Contrary to widespread belief, there is no "secret" list of fees that health insurance plan and third-party payers use to determine the appropriateness of your charges. Many firms sell fee databases to payers. Payers in turn may utilize one or more of these databases, as well as relative value systems, during the payment adjudication process. This is especially true for rarely performed services for which reliable payment guidelines are lacking. Additionally, different payers set payment limits at different levels. For example, one health insurance plan and/or third-party payer may reimburse at the 90th percentile, another at the 75th percentile, and yet another at the 80th percentile. HMOs and other managed care groups typically negotiate fees that are closer to the 50th percentile for a given area.

HOW WE ESTIMATE FEES FOR NEW CPT CODES

When new CPT codes are introduced at the beginning of each year, it takes several months before health care providers begin routinely submitting them on health insurance claims, before payers begin establishing payment criteria, and before enough claims data becomes available to establish UCR fees and percentiles. Thus, the UCR fees for new CPT codes presented in herein are estimates and should be viewed as such.

Two methods were used in preparing fee estimates for new CPT codes. The first method uses a proprietary formula created by PMIC to estimate UCR fees by analyzing UCR and RVU data for related and/or similar CPT codes and then applying the results to the new code(s).

Second, in instances where Medicare has not assigned RVU values, Medicare Fee Schedule data was used. For example, most laboratory services covered by Medicare are under a non-RBRVS schedule. To estimate fees and values for the new lab codes, Medicare's 2024 laboratory fee schedule data was scaled to UCR levels using methods like those

discussed above. In the case where no data existed that could be used to estimate the UCR percentiles for new codes, no fee data is listed.

The reader is reminded that all UCR fees listed for new codes are estimates. Even though these estimates have been created on a logical basis by using relative value data, there is no way to determine the validity or accuracy of the estimates until data based upon actual claims has been obtained. At the same time, we feel strongly that setting your fees for these new codes somewhere between the 75th and 90th percentiles are justified based upon the logic used to create the estimates.

GEOGRAPHIC VARIABILITY AND ADJUSTMENT

The 50th, 75th and 90th percentile fees provided in this text are based on national averages and are generally reflective of payer allowables. However, medical fees vary substantially by geographic area. In rural and smaller urban areas, the payer allowables may be significantly lower than the percentiles presented in this text. Conversely, in large urban areas the payers may allow fees that are much higher than the average fees shown.

The last chapter of this book includes a list of geographic adjustment factors for cities, counties, areas, regions and states which may be used to "fine tune" the data in this report. The Geographic Adjustment Factors (GAF) are calculated using a weighted average of the work, practice expense and malpractice expense components of the GPCIs. The GAFs can be used to make reasonably reliable geographic adjustments of the UCR fees and Medicare fees.

A SHORT COURSE IN STATISTICS

The usual, customary and reasonable fees in this publication are presented as percentiles. Other publications use fee ranges or average fees instead of percentiles. The use of percentiles is much better than using fee ranges or averages. Presenting a fee range of lowest to highest is only of use to find out if you are lower than the lowest or higher than

the highest. It really doesn't help you determine where you should be within the range.

WHAT IS A PERCENTILE?

A percentile is defined as a value on a scale of one hundred that indicates the percent of a distribution that is equal to or below it. To determine the percentile distribution of medical fees, you first must sort all the fees collected for each CPT code in numerical order. Then you review the distribution of fees on the percentage scale to determine what the fee values are at the desired percentages. The following simple list helps to illustrate how the 50th percentile is determined.

The easiest way to understand percentile distribution is by showing it as a curve as illustrated below. The curve is created by plotting the fees from a list of fees (see the example on the following page) to determine the percentiles. To illustrate this concept more clearly, let's presume that we have a series of 13 fees for a specific service or procedure that represent 13 different providers. The first step is to rank the fees in ascending order by dollar amount. Then we find the 50th percentile or median by counting down to the middle of the list.

Sample Distribution CPT Code 99213

Sample fee #1	=	\$61
Sample fee #2	=	\$63
Sample fee #3	=	\$65
Sample fee #4	=	\$67
Sample fee #5	=	\$69
Sample fee #6	=	\$71
Sample fee #7	=	\$73 ◀ 50 th percentile
Sample fee #8	=	\$75
Sample fee #9	=	\$77
Sample fee #10	=	\$79
Sample fee #11	=	\$81
Sample fee #12	=	\$83
Sample fee #13	=	\$97

50th Percentile

In the previous Bell curve illustration, the 50th percentile means that 50 percent of all fees for CPT code 99213 fall at or below \$73.00. It also means that 50 percent of all fees for CPT code 99213 fall at or above \$73.00. You do not want your fees to be on the left side of the curve because that means that a) you are charging less than over half of all providers for the service and b) you are not getting the payment you deserve.

The 50th percentile is also known as the median. The 50th percentile or median is not the same as the average or mean.

75th Percentile

In the Bell curve on the previous page, the 75th percentile means that 75 percent of all fees for CPT code 99213 fall at or below \$83.00. It also means that 25 percent of all fees for CPT code 99213 fall at or above \$83.00. Being within the 50th to the 75th percentile range is better than being below the 50th percentile.

90th Percentile

In the Bell curve on the previous page, the 90th percentile means that 90 percent of all fees for CPT code 99213 fall at or below \$97.00. It also means that 10 percent of all fees for CPT code 99213 fall at or above

\$97.00. Being within the 75th to the 90th percentile range is better than being in the 50th to the 75th percentile range, unless market forces dictate otherwise. For example, for services that are frequently shopped by patients on price, such as total obstetrical care, it would be better to position your fee for this service closer to the 50th percentile to be competitive.

If your fee is above the 90th percentile, you are charging more than 90 percent of all physicians for procedure. In most cases this would indicate that your fee is too high; however, there are some exceptions. The exceptions are usually based upon specialty differentials, i.e., the traditional thinking that a service performed by a specialist is worth more than the same service performed by a non-specialist.

WHERE YOUR FEES SHOULD BE

The objective of your fee schedule management program should be to keep your fees at the high end of the percentile distribution while still considering other factors, such as local customs and market considerations, which may require an occasional exception. If you find that your fee for a specific service or procedure is lower than the 50th percentile fee, that means that more than 50 percent of all health care providers charge more than you do for this service. It also means your fee is too low and you should raise it.

Likewise, if you find that your fee is higher than the 90th percentile fee, then you are charging more than 90 percent of all health care providers for this service. It may also mean that your fee is too high, but not necessarily. You may simply have done a better job at fee schedule management for a long enough time to get your fees up to a maximum level. You may also be a member of a select group of super specialists who have traditionally charged higher fees for certain procedures and consultations.

GEOGRAPHIC VARIABILITY OF MEDICAL FEES

The percentile fees presented in this book are based on national fee data; however, medical fees vary substantially by geographic area. In rural areas and smaller towns and cities, medical fees may be significantly lower than the percentiles presented in this book. Likewise, in larger cities, medical fees may be significantly higher than the fees presented. There are two primary reasons for the geographic variation in medical fees: namely, the cost of running a medical practice and the cost of medical malpractice insurance.

The cost of practice includes rent, employee costs, and other overhead costs, but not medical malpractice costs. According to the cost of practice indexes published in the Medicare Physicians Fee Schedule, Santa Clara County (Jose area), California has the highest cost of practice and the state of Mississippi has the lowest cost of practice. The second reason for the geographic variation in medical fees is the cost of medical malpractice insurance. According to the malpractice expense indexes published in the Medicare Fee Schedule, Miami, Florida has the highest cost of medical malpractice insurance and Nebraska has the lowest cost of medical malpractice insurance.

These differences in the cost of practice and medical malpractice insurance are reflected in the wide range of fees charged by doctors for identical services provided in different geographic locations.

THE GEOGRAPHIC ADJUSTMENT FACTOR (GAF)

To help you improve the accuracy of your percentile medical fees in the area where you practice, we have included an appendix of the Medicare Fee Schedule geographic cost of practice indexes (GPCI) and a geographic adjustment factor (GAF).

The GAF is a sum of the weighted averages of the three GPCIs for each locality. The

weighting factors are from the CMS report *“Review of Alternative GPCI Payment Locality Structures – Final Report,”* published in 2010, which weights the physician work GPCI at 52 percent, the practice expense GPCI at 44 percent and the malpractice GPCI four percent. The GAF provides a quick and simple way to determine a more accurate fee for a specific geographic location of a medical practice.

The appendix includes a list of geographic adjustment factors for cities, counties, areas, regions and states that can be used to “fine tune” the fees listed in this book.

HIGHEST AND LOWEST GAFS

The amount of work involved in a medical service or procedure is relatively constant regardless of geographic location. However, practice expense and medical malpractice expense vary greatly from one area to another.

The charts on the following pages list the ten highest and ten lowest locations for overall geographic adjustment factor, practice expense and malpractice expense. The results are not surprising. The highest ranked locations are in the major metropolitan cities and the lowest ranked locations tend to be found in the southern and mid-western states.

HOW TO REVIEW YOUR FEES

The process of fee schedule review includes gathering resource materials, reviewing the procedure and diagnostic codes you use, reviewing the fees charged for each procedure, making decisions regarding fee adjustments, and making sure that the resulting decisions are implemented and followed.

RESOURCE MATERIALS

Current Code Books

Your fees for medical services and procedures are linked by common business practice and legislation to CPT, HCPCS and ICD-10-CM

codes. For commercial health insurance plans and third-party payers, these coding systems define what you did and why you did it. Plus, their usual, customary and reasonable (UCR) statistics are maintained by procedure code. For Medicare, the codes are an integral part of the Medicare Fee Schedule used to define the relative values of each procedure and are mandated by the new HIPAA legislation. CPT, HCPCS and ICD-10-CM code books may be obtained from many sources, including your local medical bookstore.

Relative Value Data

The relative value reflects the complexity of a service or procedure from a medical point of view. The most widely used source of relative value data is from the Resource-Based Relative Value Scale (RBRVS), a component of the annual Medicare Physician Fee Schedule published by CMS.

RBRVS was originally developed for Medicare but is now widely used by commercial insurance plans and other government payers. RBRVS originally included only those CPT codes most likely to be used by providers when treating Medicare patients but has been expanded to include most CPT codes.

RBRVS was originally developed for Medicare but is now widely used by commercial insurance plans and other government payers. RBRVS originally included only those CPT codes most likely to be used by providers when treating Medicare patients but has been expanded to include most CPT codes.

CMS depends heavily on the recommendations of the Relative Value Update Committee (RUC) of the American Medical Association. The RUC consists of physicians representing various specialty societies, geographic areas, and practice settings. The committee performs a major review of the relative values every five years, but every year the relative values are updated for all new or changed CPT codes.

The specialty society advisors determine relative values based on time, mental effort

and judgment, technical skill, physical effort and stress due to patient risk required to perform each service or procedure. The Specialty Society makes recommendations to the RUC which in turn makes a proposal to CMS. About 95% of the RUC recommendations are accepted by CMS each year. CMS publishes the relative values for the next calendar year in the Federal Register, usually in late November or early December.

COMPONENTS OF PRACTICE EXPENSE

Medical practice expenses encompass a wide range of costs associated with running a healthcare practice. These expenses are essential to maintaining the practice's operations and providing quality patient care. The key components of medical practice expenses include:

Personnel Costs:

- Salaries and wages for physicians, nurses, medical assistants, and administrative staff.
- Employee benefits, such as health insurance, retirement contributions, and paid time off.
- Payroll taxes and other related expenses.

Rent or Lease Costs:

- Rent or lease payments for office space, clinic facilities, and equipment.
- Maintenance and utilities expenses for the rented or leased space.

Medical Equipment and Supplies:

- Costs associated with purchasing, maintaining, and repairing medical equipment and instruments.
- Expenses for medical supplies, including medications, vaccines, bandages, and disposables.

Administrative Costs:

- Office supplies, stationery, and printing materials.

- Expenses for billing and practice management software, electronic health records (EHR), and other technology solutions.
- Office furniture and fixtures.

Insurance Expenses:

- Malpractice insurance premiums to protect against liability claims.
- Health insurance coverage for employees.
- Property and liability insurance for the practice facility.

Marketing and Advertising:

- Costs for marketing and advertising efforts to attract new patients and retain existing ones.
- Expenses for website development, online advertising, and print materials.

Professional Fees:

- Fees for consultants, accountants, and legal services.
- Costs associated with compliance and regulatory requirements.

Utilities and Maintenance:

- Utilities expenses, including electricity, water, gas, and internet services.
- Maintenance and repair costs for the facility, including HVAC systems and plumbing.

Office Management and Rent:

- Expenses related to office management, such as office management software and management salaries.
- Rent or lease costs for administrative office space.

Continuing Education and Training:

- Costs for physicians and staff to attend conferences, seminars, and training programs to stay updated on medical advances and maintain licensure.

Licensing and Regulatory Fees:

- Fees associated with maintaining medical licenses and complying with healthcare regulations.
- Costs for accreditation and certification programs.

Depreciation:

- Depreciation expenses for the gradual wear and tear of assets like medical equipment, furniture, and computer systems.

Miscellaneous Expenses:

- Other miscellaneous expenses that may include legal fees, marketing expenses, travel and transportation costs, and office snacks or amenities for staff and patients.

Taxes:

- Federal, state, and local taxes, including income taxes and property taxes on the practice's real estate.

It's important for healthcare practices to manage these expenses effectively to maintain financial viability while providing quality care to patients. Effective budgeting, cost control measures, and financial planning are essential for the sustainability of medical practices.

MEDICAL MALPRACTICE EXPENSE

The cost of malpractice insurance for healthcare providers can be influenced by various factors, including patient demographics. While patient demographics themselves may not directly determine insurance costs, they can indirectly impact them in several ways:

Case Complexity:

The mix of patients in a healthcare provider's practice can affect malpractice insurance costs. Providers who primarily treat high-risk or complex patient populations may face higher premiums. For example, a surgeon specializing in high-risk procedures may pay

more for malpractice insurance compared to a primary care physician with a lower-risk patient population.

Geographic Location:

Patient demographics can vary significantly by geographic location. Physicians practicing in areas with higher population densities or where there's a higher incidence of malpractice claims may face increased insurance costs. Urban areas often have higher premiums due to more potential claims and increased competition among healthcare providers.

Specialization:

Physicians who specialize in fields with higher malpractice risk, such as obstetrics or neurosurgery, may have higher insurance premiums compared to those in lower-risk specialties. This specialization can also be influenced by patient demographics, as some areas may have a higher demand for certain specialties based on the patient population's needs.

Socioeconomic Factors:

Patient demographics may include factors such as income levels, education, and access to healthcare. Providers serving lower-income or underserved communities may experience different malpractice insurance costs due to various risk factors, including limited resources and potential complications.

Malpractice Claims History:

The history of malpractice claims in a specific patient demographic or geographic area can affect insurance rates. High rates of claims in a particular region or among a specific patient group may result in increased premiums for providers in those areas.

Tort Laws and Regulations:

State-specific tort laws, regulations, and legal precedents can impact malpractice insurance costs. Some states have enacted tort reforms that cap damages or implement other liability limitations, which can affect insurance rates.

Insurance Company Policies:

Insurance companies may take patient demographics into account when determining premiums. They may use historical claims data to assess risk and set rates for healthcare providers based on the patient populations they serve.

It's essential to note that while patient demographics can indirectly affect malpractice insurance costs, insurance companies consider various factors when determining premiums, including a provider's individual claims history, experience, and the limits and coverages chosen. Therefore, the relationship between patient demographics and malpractice insurance costs is complex and influenced by multiple factors. Providers seeking malpractice insurance should consult with insurance brokers and companies to obtain personalized quotes and understand the specific factors impacting their premiums.

MEDICARE FEE SCHEDULE

The revised Medicare Fee Schedule is published in the Federal Register in late November or early December each year. You may obtain a copy of the Medicare Fee Schedule from your local Medicare carrier, the U.S. government Printing Office, or from private publishers.

GEOGRAPHIC COST OF PRACTICE INDEXES

The Geographic Cost of Practice Indexes, referred to more commonly as GPCIs, are an integral part of the Medicare Fee Schedule. GPCIs are used to make geographic adjustments to the fees calculated using the fee schedule. Current GPCIs are available from your local Medicare carrier, the U.S. government printing office, and private publishers.

INSURANCE CARRIER EXPLANATION OF BENEFITS (EOBS)

You should collect sample copies of Explanation of Benefits (EOBs) from commercial health insurance plan and third-party payers for at least three months prior to your planned fee schedule review. Typically, this would be in the last quarter of each calendar year. You don't need a copy of every EOB you receive but you should keep copies of those which include payment for your most common procedures and services. Plus, you should keep copies from different commercial health insurance plans and third-party payers even when they are paying for the same procedures or services.

REVIEW PROCEDURE AND SERVICE CODES IN THE CURRENT CPT CODING REFERENCE

Purchase a copy of the revised CPT codes each year and review carefully for any changes which may affect your practice. Review each of the procedure codes from your code listing or superbill in your current CPT coding reference. Pay particular attention to codes that have been added, changed or deleted. Your first step should be to review the summary of additions, changes and deletions, typically included as an Appendix in most CPT coding references. This is the quickest way for you to first cross-reference the codes that you use frequently, and then refer to the full text for make your changes.

- All CPT codes in the new edition marked with a small black circle to the left of the code are NEW codes. Review all new codes carefully to see if any of them can be used instead of UNLISTED procedure codes or as replacements for HCPCS codes.
- ▲ All CPT codes in the new edition with a small black triangle to the left of the code are CHANGED codes. Review the description of all changed codes carefully to make sure that your superbills and

insurance forms have the same descriptions. Not only will this improve your payment, but it will also protect you from audit liability.

- () All CPT codes in the new edition enclosed in parentheses are deleted effective January 1st of the year following publication. Most CPT coding references include a referral to a replacement code for most codes that are deleted. Make sure you substitute the replacement codes on your superbills and coding lists.

REVIEW ALL SECTIONS IN THE CPT CODING REFERENCE

Evaluation and Management

Review this section carefully each year for changes in office, hospital, consultation, and other location visit codes.

Surgery

Review all portions of this section of CPT which may be appropriate to your medical practice. Non-surgical practices should review the sections on wound repair, trauma related codes, and any other procedures commonly performed. Pay particular attention to, add-on (+) procedures, and procedures classified as (separate) procedures.

Radiology

Medical practices providing and/or billing for radiology procedures should review this section of CPT carefully. This section includes procedures that are typically performed on a high-volume basis, such as chest x-rays, where a small increase in an individual fee can result in a significant increase in total payment.

Laboratory

Medical practices providing and/or billing for laboratory procedures need to review this section of CPT carefully. This section typically includes procedures that are performed on a high-volume basis, such blood

counts, urinalysis, etc., where a small increase in an individual fee can result in a significant increase in total payment.

Medicine

All medical practices should review this entire section to update injections, specialty procedures and diagnostic procedures.

REVIEW CURRENT HCPCS CODES

Purchase a copy of the revised HCPCS codes each year and review carefully for any changes which may affect your practice. Review your most current HCPCS coding reference, particularly the sections covering supplies, materials and injections. CMS revises these codes on an annual basis and most Medicare carriers make continual revisions which are published in the form of newsletters. Use of the proper HCPCS codes can make a significant difference in your payment.

Remember that while HCPCS National Level 2 codes are uniform throughout the United States, the method of billing the codes may vary from one Medicare carrier to another. Check with your local Medicare carrier for proper billing instructions.

REVIEW CURRENT ICD-10-CM CODES

ICD-10-CM replaced ICD-9-CM on October 1, 2015. Purchase a copy of the revised ICD-10-CM codes each year and review carefully for any changes which may affect your practice. It is important that you are using the most current diagnosis codes from the International Classification of Diseases, 10th Revision, Clinical Modification (ICD-10-CM). This book is revised and published annually by PMIC and other publishers. Keep track of the frequency of your ICD-10-CM code usage. Add frequently used codes to your reference listings and superbills.

REVIEW ALL YOUR FEES

Review and compare each of your procedures carefully to determine if fees need to be increased, due to increased costs or to maintain your profile, or decreased, in response to changing market conditions or decreased costs. Pay particular attention to the volume of procedures. Small increases in frequently performed procedures and large increases in infrequently performed procedures can usually be implemented without negative results.

REVIEW AND REVISE YOUR SUPERBILLS AND FEE SCHEDULES

After you have reviewed all CPT, HCPCS, and ICD-9-CM codes and descriptions and made any necessary revisions to your fees, you need to carefully review all your superbills and any other documents that may have codes, descriptions or fees printed on them. Make the required changes and then make sure that the revisions are made, and the documents printed.

We strongly recommend that you limit the quantity of superbills printed to no more than a six-month supply. Inevitably you will change procedure codes, diagnosis codes and/or fees during a six-month period and you want to reserve the ability to reprint your superbills without throwing too many away. We also recommend that you do not print fees on your superbills. While it is easier than looking up fees at the cashier's or receptionist's desk, it also causes potential billing errors for interim fee changes.

Distribute copies of the revised superbills and/or fee schedules to all staff members. Consider that not only billing personnel are involved with codes and fees. The person who answers the telephone in response to fee inquiries from potential patients needs to be well informed about your current fee schedules.

STAND BY YOUR FEES

Once your fees are set stand by them. Make few exceptions to your standard fees and always document exceptions by posting full charges followed by an adjustment. This makes billing easier for everyone and provides an accurate record of how much you are discounting.

RELATIVE VALUE ANALYSIS

Complete a relative value analysis to calculate a conversion factor for your practice. Then use the calculated conversion factor to determine the appropriate fee for each of your procedures. To perform a relative value analysis, you need a current relative value publication, and a list of your 25 most performed procedure codes from the Medicine, Surgery, Radiology and Pathology sections of CPT, and your fees for the procedures. Then complete the following six steps for each section.

1. List 25 codes and fees for each section.
2. Look up the relative value and add to your list.
3. Total all the fees.
4. Total all the relative values.
5. Divide the total relative values into the total fees.
6. The result is your average conversion factor.

After you calculate your average conversion factor, you can then multiply the relative value for each of the listed procedures by the conversion factor to determine what the fee should be. It is not unusual to find services and procedures both under and overpriced based on relative value analysis. Before raising your prices based on relative value analysis, consider that all health insurance plans and third-party payers have a maximum dollar value, based on usual, customary and reasonable fees that they allow for a given procedure. However, the use of relative values gives you a strong argument for a review of a disputed or underpaid claim.

SAMPLE RVS ANALYSIS FOR SELECTED OB/GYN PROCEDURES

On the following page there is a sample relative value analysis using 25 commonly reported OB/GYN procedures. In addition to the CPT code and description you will find the 75th percentile fee and relative value from this publication. The conversion factor is calculated by dividing the total relative values into the total charges. Obviously, a conversion factor calculated using fees at the 50th percentile would be lower and a conversion factor using fees at the 90th percentile would be higher.

DETERMINING FEES FOR NEW PROCEDURES

If you perform a service or procedure for the first time and need to determine a fee, the first place to look would be your relative value reference. If the procedure is listed and has a numeric value, then simply multiply the relative value by your conversion factor to determine the appropriate fee. However, if the procedure or service is unlisted, then you can't calculate a fee by this method. The best alternative is to use a comparative procedure as the basis for first determining approximate relative value and then to calculate the proper fee. Review some of the more common procedures you perform and try to find one that requires similar skills, about the same amount of time, and has the same level of complexity and risk as the new procedure.

Use the relative value of the common procedure as a basis for calculating the fee for the new procedure. Watch insurance carrier EOBs carefully to see how much they are allowing for the new procedure and adjust your fee accordingly. You can also request the prevailing charge for the procedure from your local Medicare intermediary.

MULTIPLE FEE SCHEDULES

It is essential to have multiple fee schedules in the well managed medical practice. The argument can certainly be made that any service or procedure is worth the same, based on relative value calculations. However, all

your potential payers do not use the same method to pay you, or to calculate the value of the services and procedures you perform. Fees charged for services provided to Medicare patients are highly regulated by Federal law. Fees charged for services provided to Medicaid beneficiaries and Worker's Compensation Carriers are generally based on fixed fee schedules published by state agencies. Many HMOs and PPOs also reimburse based on fee schedules.

None of these rules and regulations or fee schedules applies to services provided to patients paying cash, services rendered to patients in personal injury cases, or for services covered by private health insurance companies and third-party payers. A medical practice with a typical patient mix including Medicare, Medicaid, worker's compensation and private health insurance patients would need to use a minimum of two or three different fee schedules for proper billing.

MEDICARE FEE SCHEDULE

Practices which are *non-participating* must use the Medicare billing limits when billing for services provided to Medicare patient their regular fees for services provided to Medicare patients. Practices which are *participating* may charge their regular fees for services provided to Medicare patients.

STANDARD FEE SCHEDULE

This is your standard fee schedule representing the fees that you charge for cash patients, private health insurance patients, Medicaid patients, and, if you are *participating*, to Medicare patients also.

WORKER'S COMPENSATION

This fee schedule is used to bill for services related to treating illnesses and injuries related to employment. The fee schedules are generally maintained and published by the state agency responsible for worker's compensation cases.

CONTRACT FEE SCHEDULES

You may have additional fee schedules, based on participating agreements with HMOs, PPOs, etc. that must be used to bill for services provided to beneficiaries of these plans.

HOW TO IMPLEMENT YOUR NEW FEE SCHEDULE

Regardless of how carefully you review and set your fees, you will still have complaints from patients. While studies have continued to indicate that most patients do not choose providers of medical care based on fees, it is important to keep in mind that many malpractice cases start out as fee disputes. Fee related complaints tend to fall under the five general categories.

FEE COMPARISON

Patients compare fees among each other. In addition, many patients shop fees for elective procedures or routine care. Patients may be well informed regarding the going rates for specific procedures and may ask why your fee is higher than that of other providers. Be prepared to explain your fees for common procedures.

FEE CONSISTENCY

Patients may question what appear to be inconsistencies in your fees from one visit to the next. Patients are not aware of the various levels of service defined by CPT and the fact that some services are packaged or bundled, and others are not. Make sure the patient understands exactly what is included in bundled procedures and is made aware of the levels of care if he/she questions your fees for visits.

Patients frequently consider the value of your services to be directly proportional to the time you spent with them. This is logical thinking on the patient's part, as many professional services tend to be rendered and billed based on units of time. Prior to publication of the

1992 edition of CPT, there were very few services or procedures that included time components. Therefore, you could explain simply to the patient that your fees are not based on the amount of time spent but rather the complexity of the situation and the level of care required.

With publication of the 1992 CPT, time became part of the definition of the new Evaluation and Management services. As the definition and understanding of the new coding system becomes widespread among the patient population, you may expect some patients to time your services and compare their time with the time associated with Evaluation and Management codes.

RELATIVE VALUE

Due to the lack of knowledge and understanding regarding anatomy, physiology and the difficulties involved in various medical procedures, patients make inappropriate comparisons of procedures. They may not understand why a repair of a hip fracture costs more than life-saving treatment for an acute myocardial infarction. Patients are not aware of the traditional discrepancy between the value of cognitive procedures versus technical procedures. of interest is the fact that patients do not recognize any differences in value between cognitive and technical services.

This subjective attitude of the patient population is verified in part by the findings of the Harvard study of Resource Based Relative Values. One of the objectives of the Medicare Fee Schedule is to legislate away the discrepancy by creating a payment system based upon measurable work and cost of practice indexes. If patients question you on this issue, be prepared to explain how your fees for technical services are calculated. Expect some of your Medicare patients to be knowledgeable of Medicare Fee Schedule rules, regulations and formulas.

DISCUSSING FEES WITH YOUR PATIENTS

DISCUSSING FEES AT THE TIME OF APPOINTMENT SCHEDULING

Some practices discuss fees in advance with patients who call to make an appointment. While this may occasionally cause problems when the bill turns out to be higher than quoted on the phone, the major benefit is that the patient has been informed that there will be a charge, and that they are expected to pay. Any statements regarding fees or amounts made during telephone conversations should be noted on the appointment schedule.

SMALL FEES CAN BE STATED AFTER SERVICES HAVE BEEN RENDERED

Services such as office visits, injections and minor procedures can generally be provided without advance discussion of fees. The provider can fill out the charge slip, or superbill including fees and instruct the patient to give it to the receptionist, or the provider can leave the fees blank to be filled out by the receptionist.

When the charge slip is totaled and presented to the patient for payment, the patient can ask questions regarding the services provided and the fees charged. Even if the patient does not pay at the time of service, this presentation of the itemized charge slip makes the patient aware of the fees, which will correspond to the bill received.

DISCUSS LARGER FEES BEFORE PROVIDING SERVICE

Numerous studies have confirmed that when patients are about to undergo major procedures that their first concern is outcome, and their second concern is how much it is going to cost and how are they going to pay for it. Unfortunately, most patients will never express this concern voluntarily. Most medical professionals discuss their findings, treatment plans and the probable outcome(s) of treatment with their patients; however, many

neglect any discussion of fees or payment methods. In addition to appreciating the information, discussing the potential cost gives the patient the ability to make an informed decision regarding the service.

HOW TO INITIATE FEE DISCUSSIONS

Not everyone is comfortable in discussing fees or money with patients. Many medical professionals absolutely refuse to engage in such discussions. It is not necessary for the medical professional to have this fee discussion with the patient, although patient surveys consistently reveal that the patient prefers to discuss fees directly with the medical professional. But it is important that someone representing the practice, the office manager, insurance manager, or the financial counselor, have a discussion with the patient regarding the fees before major services are rendered.

It is important to make the patient aware that your fees are within the going rates for the community, that the fees to this patient are the same as that for every patient, and, for bundled procedures, that your fee includes specific services and procedures. The following statements represent some of the more successful approaches to this subject:

My (our, the doctor's) usual charge for this service is....

This lets the patient know what the charge will be and that they are being charged the same as everyone else.

The going rate for this service (around here, in the community)

This opening gives you two options. Either it assures the patient that your fees are in line with those of your colleagues, or it gives you the opportunity to explain why your fees are higher.

My (our, the doctor's) fee covers....

This approach is often used when discussing fees that are global in nature, primarily surgical procedures which include a standard amount of routine follow-up care. Another example would be prenatal care, uncomplicated vaginal delivery and the postpartum visit. This lets the patient know that a single fee covers all the service.

It is better to state your usual charge first and then explain that any insurance proceeds will be applied against it. By mentioning insurance first, you risk the patient assuming that you will scale your charges based upon insurance payment.

Don't worry. We'll take your insurance as full payment....

What if the patient isn't covered, but doesn't know it? What about deductibles and coinsurance? What about pre-existing conditions and exclusions? You can be sued by the patient for breach of contract if you make the above statement and then attempt to collect from the patient any unpaid balance after insurance, even if the insurance pays you nothing!

Many health insurance companies and third-party payers are helping you to protect yourself by requiring pre-Certification before covering services and providing benefits. Many insurance contracts now require pre-authorization for non-emergency hospitalization as well as for certain "abused" procedures such as Total Abdominal Hysterectomy. Failure to obtain pre-authorization can result in outright denial of claims and/or benefit reductions of up to 50 percent with no appeal! In most cases, the

patient does not even know that these requirements exist.

STRATEGIC PRICING

In today's competitive environment the successful practice will learn how to keep its existing patients, attract new patients, and increase its profitability by raising some fees,

lowering others, and maintaining enough flexibility to adjust specific fees in response to new opportunities. This process is known as *strategic pricing* and incorporates the following concepts:

MARKET DRIVEN PROCEDURES

Some procedures are price sensitive, and patients do call to ask prices of some procedures or services, such as total obstetrical care. It is important that fees for such services be kept comparatively low. On the other hand, consumers know that some procedures are necessary for them to maintain, and they don't shop around for these procedures.

In addition, if your practice provides services that are market driven you want to make sure that the person handling these telephone inquiries is a good salesperson. Ideally, the prospective patient would be "sold" on how good the practice, doctor and/or service is before the requested fee is quoted. This simple technique can significantly increase your new patient volume.

RELATIONSHIP BUILDING

Building a successful practice requires the development of long-term relationships with patients and/or referral sources. Part of your pricing strategy should be based on attracting new relationships with patients or referral sources and on maintaining and develop existing relationships. How much you charge, whether you charge, and how you bill are all considerations that may impact a relationship.

An example of this component of strategic pricing is the "free" consultation that most pediatricians provide to parents who are interviewing potential physicians for their new (or about to be born) babies. An investment of 30 to 45 minutes late in an afternoon can result in a patient relationship lasting for 20 years! More and more medical professionals are making themselves available for patient interviews.

PRICE SENSITIVITY

Patients are consumers and they expect prices to increase, including yours. However, they do not react positively to sudden or large increases in fees. This happens most often when the practice has held down fees for a long time and then increases fees suddenly, and by large amounts. This is easy to avoid by using more frequent, small increases.

VOLUME CONSIDERATION

Pay particular attention to volume when considering fee increases. A large increase in a fee that is infrequently performed or rarely repeated on the same patient will likely go unnoticed. Likewise, a small increase in your fees for frequent procedures will also be expected by most patients

PROMOTIONAL PRICING

Fees for certain services and procedures may be used to attract new patients to your practice. Many practices offer "free" screenings, or reduced fees for physical exams, pap smears, and other preventive services. In today's more health-conscious society, patients are very receptive to these new marketing techniques. In addition, you or your practice may have services, skills, methods, or special office hours that are not offered elsewhere or close by. Patients do place special value on special services and abilities and are usually willing to pay more for them.

OPTIONS TO INCREASING YOUR FEES

INCREASE PRACTICE PRODUCTIVITY

This doesn't necessarily mean you have to work more, harder or longer. It means simply that you need to look at how you work to make sure you are using your time in the most profitable manner. You may need to implement a more formal scheduling and

record keeping system for out-of-the-office services to keep track of your time better, and to make sure you are billing for all your services.

Maybe it's time to bring in an associate to take care of those referrals you have been turning down. Or maybe you are considering extended office hours one evening during the week and Saturday mornings to meet the increasing demands of your patients for more convenient (to them) hours.

Make sure that the time you spend with each patient is appropriate for the level of care you need to provide. This means that you must provide exactly the right amount of your time, from your perspective, to keep your schedule, and, the right amount of your time, from the patient's perspective, to provide the perception of value received.

REDUCE YOUR DISCOUNT BUSINESS

Despite the continuous national furor over medical fees, the truth is, that with very few exceptions, all medical practices are operated as discount businesses. Typical discounts include:

- Giving a discount for cash payment at the time of service
- Discounting your services as a professional courtesy
- Accepting insurance payment as payment in full
- Accepting payments on account without interest charges
- Referring accounts to a collection agency
- Writing off an account as a bad debt
- Accepting a capitation or discounted payment from an HMO, IPA or PPO
- Participating in Medicare
- Providing services to Medicaid patients

You must take the time to review your practice by revenue sources to determine if the

types of patients you are attracting and the associations you have with payers are profitable. This review process should include answering the following questions:

- Is Medicare participation in the best interest of my practice?
- Should I implement payment at the time of service?
- Are the contracts I have with HMOs and PPOs profitable?
- Do I have too many Medicaid patients?
- If I reduce my nonprofitable patient categories, can I replace them with profitable ones?

Finding the right answers to these questions for your practice requires an in-depth evaluation of your practice economics, patient demographics, the potential patient pool, patient attitudes, and the attitudes, practices and standards of your medical community.

MEDICAL FEES

FORMAT OF THE LISTINGS

The medical fees listings are presented in six sections, which correspond to the six sections of CPT 2023. Within each section are subsections with anatomic, procedural, condition or descriptor subheadings. The procedures and services are listed in numeric order with exception of the Evaluation and Management section. The Evaluation and Management section has been placed at the beginning of the medical fees listings, because these CPT codes are used by most physicians in reporting a significant portion of their services.

Each entry includes the CPT code, a short description of the procedure or service, UCR fees at the 50th, 75th and 90th percentiles, the national average Medicare fee and the Medicare RVU. Some CPT codes are listed twice. The second listing includes the modifier -26 to indicate that the listing is for the "professional component" of the procedure only.

CPT

CPT procedure code

All procedure codes listed in this publication are CPT 2023 codes. CPT codes are revised and published annually by the American Medical Association (AMA).

Modifier -26 or –TC (No header)

Certain medical procedures are a combination of a physician, or professional, component and a technical component. When the physician performs and reports both parts of the service, the service is reported without modifier -26. When the physician performs and reports only the professional component, the modifier -26 is added to the basic procedure and the fee reduced accordingly. The technical

component is usually reported by the hospital with the addition of the modifier –TC.

Description

The descriptions listed in this publication are the official CPT 2023 full descriptions. To make sure that the reader correctly matches the fee information with the proper CPT code, the full description is presented for every CPT code listed.

UCR 50th

Usual, customary and reasonable fee at the 50th percentile

The amount listed in this column represents the 50th percentile of usual, customary, and reasonable fees for the specific service or procedure. The 50th percentile is that point where 50 percent of fees for a given procedure are at or below the amount listed and 50 percent are higher than the amount listed. A zero in this column means that the procedure is an unlisted procedure or there is no data with which to make the calculation or insufficient data to calculate the amount.

UCR 75th

Usual, customary and reasonable fee at the 75th percentile

The amount listed in this column represents the 75th percentile of usual, customary, and reasonable fees for the specific service or procedure. The 75th percentile is that point where 75 percent of fees for a given procedure are at or below the amount listed and 25 percent are higher than the amount listed. A zero in this column means that the procedure is an unlisted procedure or there is no data with which to make the calculation or insufficient data to calculate the amount.

90th UCR

Usual, customary, and reasonable fee at the 90th percentile

The amount listed in this column represents the 90th percentile of usual, customary, and reasonable fees for the specific service or procedure. The 90th percentile is that point where 90 percent of fees for a given procedure are at or below the amount listed and 10 percent are higher than the amount listed. A zero in this column means that the procedure is an unlisted procedure or there is no data with which to make the calculation or insufficient data to calculate the amount.

MFS 2024

Medicare Fee Schedule fee for 2024

The amount listed in this column was calculated by multiplying the total Medicare relative value units from the Medicare Fee Schedule times the proper conversion factor for the code. This amount is listed as a reference so that you can see the relative differences between the UCR and Medicare Fee Schedule amounts for a particular service.

MFS RVU

Medicare Fee Schedule Relative Value Units for 2024

The number listed in this column is the relative value unit from the Resource-Based Relative Value Scale (RBRVS), a component of the annual Medicare Physician Fee Schedule published by CMS. The relative value reflects the complexity of the procedure from a medical point of view. CPT codes for "unlisted" or "by report" services do not have assigned relative values in RBRVS for obvious reasons. Other services or procedures may be provided too infrequently for CMS to establish a relative value.

GEOGRAPHIC ADJUSTMENT

GEOGRAPHIC VARIATION OF MEDICAL FEES

The percentile fees presented in this book are based on national fee data; however, medical fees vary substantially by geographic area. In rural areas and smaller towns and cities, medical fees may be significantly lower than the percentiles presented in this book.

Likewise, in larger cities, medical fees may be significantly higher than the fees presented.

There are two primary reasons for the geographic variation in medical fees; namely, the cost of running a medical practice and the cost of medical malpractice insurance.

The cost of practice includes rent, employee costs, and other overhead costs, but not medical malpractice costs. According to the cost of practice indexes published in the Medicare Physicians Fee Schedule, the San Jose-Sunnyvale-Santa Clara areas of California have the highest cost of practice index at 1.432, and the state of Mississippi has the lowest cost of practice index at 0.852. Statistically, the cost of running a medical practice in San Jose-Sunnyvale-Santa Clara is about 68% higher than running a medical practice in Mississippi based upon the cost of practice index.

The second reason for the geographic variation in medical fees is the cost of medical malpractice insurance. According to the malpractice expense indexes published in the Medicare Fee Schedule, Miami, Florida has the highest cost of medical malpractice insurance expense index at 2.500, and the state of Minnesota Nebraska has the lowest cost of medical malpractice insurance expense index at 0.300. Statistically, medical malpractice insurance expense is about 830% higher in Miami, Florida compared to the state of Minnesota.

These differences in the cost of practice and medical malpractice insurance are reflected in the wide range of fees charged by doctors for

identical services provided in different geographic locations. The d

THE GEOGRAPHIC ADJUSTMENT FACTOR (GAF)

To help you improve the accuracy of the percentile medical fees in the area where you practice, we have included this appendix of the Medicare Fee Schedule geographic cost of practice indexes (GPCI) and a weighted geographic adjustment factor. A geographic adjustment factor (GAF) is a multiplier used to determine a more accurate fee for a specific location of medical practice. This appendix includes a list of geographic adjustment factors for cities, counties, areas, regions and states which can be used to "fine tune" the medical fees listed in this book. The geographic adjustment factors listed below are calculated using data from the 2023 Medicare Physician's Fee Schedule.

The GAF listed below is a weighted average of the work, practice expense and malpractice expense components of the most current Medicare Fee Schedule. The GAF is used to calculate the approximate variations of geographic location on both the UCR and Medicare fees listed in this publication.

STATE/LOCALITY NAME

The geographic region included in the geographic adjustment factor. Note that most geographic adjustment factors correspond to entire states or specific cities. But others correspond to specific counties, or terms such as urban, metropolitan, rural, large, small, northwest, southwest, etc.

CARRIER/LOCALITY

The Medicare carrier code and locality assigned by CMS. The carrier code is included so that you can clearly identify the specific geographic regions represented by the geographic adjustment factors.

The location code is included so that you can clearly identify the specific geographic regions represented by the geographic adjustment factors.

WORK GPCI

This field defines the Medicare geographic cost of practice index for the work component of the procedure or service.

PE GPCI

This field defines the Medicare geographic cost of practice index for the practice expense component of the procedure or service.

MP GPCI

This field defines the Medicare geographic cost of practice index for the malpractice expense component of the procedure or service.

WGT GAF

This field is the sum of the weighted averages of the three GPCIs for each locality. The weighting factors are from the CMS report “*Review of Alternative GPCI Payment Locality Structures – Final Report*,” which weights the physician work GPCI at 52 percent, the practice expense GPCI at 44 percent and the malpractice GPCI four percent. The GAF provides a quick and simple way to determine a more accurate fee for a specific geographic location of a medical practice.

**HOW TO USE THE GAF TO
ADJUST MEDICAL FEES**

To use the geographic adjustment factor, first look up the CPT codes in the book that you want to compare to your doctor's fees or health insurance carrier allowances. Write down the 50th, 75th and 90th percentile fees for each CPT code. Then look up the geographic adjustment factor for your city, county, area, region or state in this appendix. Finally, multiply the percentile fees times the

geographic adjustment factor to determine the adjusted fee.

The table on the following page compares fees for two medical services provided in Arkansas, San Jose-Sunnyvale-Santa Clara, CA and Kentucky after adjustment using the GAF.

SAMPLE CALCULATION OF ADJUSTED FEES

Sample 1: E & M Service			UCR 50TH	UCR 75TH	UCR 90TH
99205	Office visit, new patient, 60 minutes/more	Unadjusted	459	602	706
	Arkansas	x 0.919	386	553	649
	California: San Jose-Sunnyvale-Santa Clara	x 1.226	563	738	866
	Kentucky	x 0.942	432	567	665
Sample 2: Surgical Procedure			UCR 50TH	UCR 75TH	UCR 90TH
33513	CABG, vein only; four coronary venous grafts	Unadjusted	7,105	9,711	13,246
	Arkansas	x 0.919	6,529	8,924	12,173
	California: San Jose-Sunnyvale-Santa Clara	x 1.226	8,711	11,906	16,240
	Kentucky	x 0.942	6,693	9,147	12,478

Using the numbers from Sample 2, these calculations indicate that calculated 90th percential UCR fees in Arkansas are statistically 8.1% lower than the national 90th percentile, 22.6% higher in the San Jose area of California, and 5.8% lower in Kentucky. As previously explained, these variations are mostly due to the cost of practice and cost of medical malpractice insurance.

MAC ASSIGNMENTS AS OF NOVEMBER 22, 2023

*Work GPCI reflects a 1.5 floor in Alaska established by the MIPPA.

**PE GPCI reflects a 1.0 floor for frontier states established by the ACA.

Note: the 1.0 work GPCI floor required by section 501 of the further continuing appropriations and other extensions act, 2024 [November 16, 2023] extended the work GPCI floor through January 19, 2024. Therefore, the work GPCIs for 2023 reflect the 1.0 work GPCI floor, work GPCIs for 2024 are shown both with and without a 1.0 floor, and work GPCIs for 2025 do not reflect a 1.0 floor.

Note: For Calendar year 2024 and on, Addendum E will reflect the retirement of three California Localities, as finalized in the Calendar year 2023 PFS Final Rule.
